QA Level 3 Certificate in First Response Emergency Care (RQF) Qualification Specification
Key qualification information

Qualification Accreditation Number (QAN) 603/0654/3
Operational start date 1 October 2016
Review date 30 September 2019
Guided learning hours (GLH): 35
Contact learning hours (CLH): 35 (minimum)
Credit value: 15
Number of units: 3 mandatory units
Assessment methods:
- Formative assessment conducted by the Trainer throughout the course
- Theory assessment/multiple choice question paper:
  - 1 x 20 question paper (minimum score 14)
  - 1 x 30 question paper (minimum score 21)
  - 1 x 30 question paper (minimum score 21)
- Practical assessment and skills test – 11 and 3 completed throughout the course
Qualsafe Awards

Not only is Qualsafe Awards (QA) one of the largest Awarding Organisations (AO) in the UK, we are also the biggest AO for First Aid qualifications, making us an extremely trusted and recognisable name that employers look for when selecting a training provider.

We are recognised and regulated by the Office of Qualifications and Examinations Regulation (Ofqual), Qualifications Wales and the Northern Ireland Council for the Curriculum, Examinations and Assessment (CCEA). This means we can offer Centres an extensive range of qualification suites including First Aid; Prehospital Care; Health and Safety; Food Safety; Fire Safety; Education and Training; Manual Handling; and Health and Social Care.

With a specialist team of subject matter experts on hand to support our Centres, including A&E Consultants, doctors, paramedics, nurses, physiotherapists and specialists in the other sectors, you can be confident that you are truly working with the industry experts.

Qualification overview

This qualification forms part of the QA Prehospital Care suite of qualifications. The qualification and learning outcomes are based on the recommendations of:

- Resuscitation Council (UK)
- Skills for Health Assessment Principles for First Aid Qualifications
- The Royal College of Surgeons of Edinburgh – Faculty of Pre-Hospital Care

Statement of Endorsement

The QA Level 3 Certificate in First Response Emergency Care (RQF) has been endorsed by the Faculty of Pre Hospital Care of the Royal College of Surgeons of Edinburgh. The Qualsafe Awards designed course also complies with the teaching and educational standards of the Faculty as described in the regulations.

This QA qualification is:

- For people who work or hope to work as emergency care providers in various healthcare settings
- Based on the Health and Safety Executive (HSE) training standard for delivery of First Aid at Work (FAW) courses for the purposes of the Health and Safety (First Aid) Regulations 1981

This qualification should give Learners a foundation level of prehospital care knowledge and clinical practice to deal with a range of prehospital care situations.

This qualification specification provides information for Centres about the delivery of the QA Level 3 Certificate in First Response Emergency Care (RQF) and includes the unit information, assessment methods and quality assurance arrangements.

Objective

The objective of the qualification is to benefit Learners by enabling them to attain the knowledge and practical competencies needed to deal with a range of prehospital emergency situations.

Purpose

The purpose of this qualification is to prepare Learners to be able to demonstrate the practical administration of safe, prompt, effective prehospital care in situations which can arise when providing emergency treatment and/or management.
Intended audience
This qualification is for people who have a specific responsibility at work, or in voluntary and community activities, to provide prehospital care to patients requiring emergency care/treatment.

Structure
This qualification comprises 3 mandatory units with a Total Qualification Time (TQT) of 150 hours. Full details of these are in Appendix 1.

Learners must complete all assessments/skills tests in the units successfully within the registration period to achieve the qualification. The minimum time to complete this qualification is 3 weeks and the maximum is 20 weeks.

Each credit is equivalent to 10 hours learning time. Learning time consists of guided learning hours (GLH) and self-directed study. GLH are a measure of the contact time a typical Learner will require in direct guidance – from a Trainer – to complete their programme of learning successfully, which for this qualification should be a minimum of 35 hours over 5 days (excluding breaks). Sessions should be a minimum of 2 hours. Learners should be encouraged to do a minimum of 118 hours of self-directed study, which should include additional reading and applied practice.

Other units
No other units can be combined to count towards the QA Level 3 Certificate in First Response Emergency Care (RQF).

Relationship with other related qualifications
The QA Level 3 Certificate in First Response Emergency Care (RQF) can be transferred to other qualifications under Recognition of Prior Learning (RPL) towards achievement of that qualification providing it is achieved within its registration period.

Recognition of Prior Learning
RPL is a process for recognising learning from previous training, qualifications or experience to avoid duplication of learning. It considers whether a Learner can demonstrate and prove that they meet the assessment requirements for a unit through knowledge, understanding or skills they already possess and do not need to develop through a course of learning. Centres should inform QA prior to undertaking this process.

RPL must be: valid, reliable, authentic, current, sufficient.

It is the Centres responsibility to make sure they do not disadvantage a Learner or compromise the integrity of the qualification when using the RPL process. If sufficient understanding of a subject is in doubt training must take place.

RPL must be current, i.e. within 3 years. RPL should only be used as rationale for a reduction in contact/guided learning hours, the Learner must still undertake assessment of all learning outcomes and criteria of the qualification in order to gain an up-to-date qualification certificate.

Evidence of prior training submitted for RPL consideration must be authenticated by the Centre and approved by QA; a certificate is not valid without referenced learning outcomes or evidence from the original training provider.
Entry requirements
Learners must be at least 17 years old on the first day of the training.

There are no other formal entry requirements but to benefit from the learning we advise that Learners have a minimum of Level 2 in literacy and numeracy or equivalent and a basic understanding of first aid.

Progression
The QA Level 3 Certificate in First Response Emergency Care (RQF) qualification may be used towards other qualifications at the same and higher levels, plus aid career progression in a relevant profession.

Requalification requirements
This qualification is valid for a period of 3 years. The Learner needs to retake the qualification before the certificate expiry date to remain qualified.

Requalification training should be delivered in no less than 21 hours (3 days) excluding breaks.

Note: Requalification requires successful completion of the original qualification.

Qualification approval requirements
Qualsafe Awards requires the Centre:

• To have appropriate policies, systems and procedures in place

• To appoint suitable individuals from their personnel team to train, assess and quality assure their QA qualifications

• To have suitable and adequate venues, equipment and learning resources

In order to secure and maintain approval from QA, Centres need a minimum staffing requirement for each qualification suite they deliver, which for this qualification is:

| One Trainer/Assessor | Responsible for the delivery and assessment of qualifications |
| One Internal Quality Assurer | Responsible for quality assuring the delivery, assessment and awarding of this qualification |

Qualsafe Awards requires the Centre staff to read and understand QA’s key policies and procedures, and to abide by their contents.

Trainer/Assessor
People delivering and assessing this qualification must have:

• Occupational knowledge and competency in prehospital care (as shown in Appendix 2) and

• An acceptable training qualification (as shown in Appendix 3) and

• Hold or be working towards an acceptable assessing qualification (as shown in Appendix 3)
Internal Quality Assurers

Internal Quality Assurers (IQAs) of this qualification must have knowledge and skills in prehospital care as well as knowledge and competency in internal quality assurance practice. An acceptable portfolio must show:

i. Occupational knowledge and skills in prehospital care – evidenced by holding a recognised qualification as shown in Appendix 4

ii. Knowledge and competency in internal quality assurance – evidenced by holding or working towards a qualification as shown in Appendix 4

They must also:

• Have knowledge of the requirements of the qualification they are quality assuring at the time the assessment is taking place

• Have knowledge and understanding of the role of IQAs

• Visit and observe assessments

• Carry out other related internal quality assurance

Full details of the Centre’s requirements for internal quality assurance are in the QA Centre Quality Assurance Guidance.

Note: IQAs cannot quality assure a course for which they were the Trainer and/or Assessor.

Venue and equipment

Quality training involves using premises conducive to learning and it is a Centre’s responsibility to make sure all venues used for training and assessment purposes are suitable and adequate – whether these are hired or in-house training rooms. They must also comply with all current legislation.

In addition, it is important there is a wide range of learning resources to support delivery.

As a minimum, Centres should make sure their venues, equipment and other resources include:

<table>
<thead>
<tr>
<th>Resource/area:</th>
<th>Requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPR Adult manikins</td>
<td>A minimum of 1 adult manikin to every 4 learners (as per the European Resuscitation Council guidelines).</td>
</tr>
<tr>
<td>CPR Child manikins</td>
<td>A minimum of 1 child manikin to every 4 learners (as per the European Resuscitation Council guidelines).</td>
</tr>
<tr>
<td>CPR Infant manikins</td>
<td>A minimum of 1 infant manikin to every 4 learners (as per the European Resuscitation Council guidelines).</td>
</tr>
<tr>
<td>Choking trainer</td>
<td>A manikin or vest that Learners can use to demonstrate treatment of choking.</td>
</tr>
<tr>
<td>Airway manikin</td>
<td>The manikin must be suitable to demonstrate the airway manoeuvres and accept oropharyngeal, nasopharyngeal and supra-glottic airways. 1 manikin to every 4 learners.</td>
</tr>
<tr>
<td>AED trainers</td>
<td>At least 1 AED trainer to every 4 learners. If fewer AED trainers are provided, adjust learning hours/ lesson plans accordingly to make sure Learners are not disadvantaged.</td>
</tr>
<tr>
<td>Suction devices</td>
<td>A minimum of 1 suction device to every 4 Learners.</td>
</tr>
<tr>
<td>Dressings/bandages</td>
<td>Sufficient trauma bandages: various sizes and types. A variety of tourniquets and haemostatic agents for management of catastrophic bleeding.</td>
</tr>
</tbody>
</table>
QA Level 3 Certificate in First Response Emergency Care (RQF)

| Oxygen/accessories | CD/D size cylinders with the relevant equipment for use. A variety of non-re-breather masks, pocket masks and bag valve masks. |
| Oropharyngeal (OPA) and nasopharyngeal (NPA) airways | A full set of OPA (sizes 00 to 4). A full set of NPA (sizes 6 to 8). |
| Burn dressings | Sufficient burn dressings. |
| Adrenaline auto-injector | A minimum of 1 adrenaline auto-injector to every 4 Learners. |
| Reliever inhaler | A minimum of 1 reliever inhaler to every 4 Learners. |
| Spacer device | A minimum of 1 spacer device to every 4 Learners. |
| Glucose gel | A minimum of 1 glucose gel (sample). |
| Safety helmet | Various sizes and types relevant to their setting, which must include motorcycle helmet and may include:  
- Ballistic helmet  
- Nato helmet  
- Cycle helmet  
- Emergency services helmet  
- Construction industry helmet |
| Immobilisation devices | Pelvic splints/slings.  
Flexible metal covered foam splints.  
Cervical collars (multi-adjust). |
| Audio visual (AV) equipment and training aids | Sufficient AV equipment and training aids to facilitate learning using varying teaching methods. |
| Learning materials | Provide Learners with clear and accurate reference books/handouts covering the topics included in the qualification. |
| Training venue | The training venue must meet acceptable health and safety standards and be conducive to learning, with sufficient:  
Size, floor surfaces, seating, writing surfaces, toilet facilities, ventilation, lighting, heating, access, exits, cleanliness, absence of distracting noise. |

Note: Learners should sit at least 1 metre apart to prevent collusion during the multiple choice question paper/theory assessment.

Course/Centre administration

Registering Learners
Register Learners with Qualsafe Awards in accordance with the guidance in the QA Centre Handbook.

Certification
After a Learner has completed an assessment, unit or qualification, whether they have passed or not, Centres must enter the details and assessment results on the Customer Portal at: www.qualsafeawards.org

Centres will be given login details and guidance on using the Customer Portal when they are approved to deliver a QA qualification.

The Learner receives 1 certificate on achieving this qualification.
The certificate date is the date the Learner achieves the final unit. This qualification is valid for 3 years. The Learner needs to re-take the qualification and the assessments before the end of the 3 years to remain qualified. Qualsafe Awards recommend Learners also complete annual basic life support or immediate life support training to maintain their basic skills and keep up to date with any changes to prehospital care practice.

### Delivery and support

#### Learner to Trainer ratio

To maintain the quality of training and assessment, make sure the class ratio is no more than 6 Learners to 1 Trainer. The assessment space should allow Learners to sit at least 1 metre apart to prevent collusion during the theory/multiple choice question paper assessment. Never allow more Learners on the course than you can cater for during the assessment.

#### Delivery plan

Qualsafe Awards provides Centres with a complimentary course programme and detailed lesson plans, which are:

- Carefully designed to meet the objective of this qualification and the needs of Learners, making sure Learners are adequately prepared for the assessments
- Endorsed by the Faculty of Pre Hospital Care of the Royal College of Surgeons of Edinburgh

Note: If Centres use their own lesson plans they are not endorsed and will not achieve the FPHC endorsement on their certificate.

Centres not using QA lesson plans, which are created and provided free on qualification approval, must submit their own delivery plan and have it approved by us before delivering this qualification. The delivery plan should:

- Include a course timetable, clearly showing the required subjects and criteria/learning outcomes are covered and the minimum 35 contact learning hours are met
- Be emailed to: info@qualsafeawards.org

#### Learning materials

Centres must provide each Learner with access to suitable learning materials to support their progress through the qualification. As a minimum we recommend:

- **Generic Core Material – Prehospital Emergency Care Course** by Faculty of Prehospital Care, Royal College of Surgeons of Edinburgh or
- **Ambulance Care Essentials, 1st edition** by Richard Pilbury and Kris Lethbridge

We would also recommend further reading in the areas of anatomy, physiology and first aid such as:

- **Anatomy and Physiology in Health and Illness, 11th edition** by Ross and Wilson
- **First Aid Made Easy** by Nigel Barraclough

Centres can choose alternative books or other learning materials but these must be approved by Qualsafe Awards prior to use.
Ongoing support

Qualsafe Awards Centres should provide appropriate levels of support to Learners, before, during and after the training. The purpose of the support is to:

• Assess knowledge and competence in relation to learning outcomes and the detailed assessment criteria of the units within the qualification, see Appendix 1
• Give Learners feedback on their progress and how they might be able to improve

Assessment

Overview

The QA Level 3 Certificate in First Response Emergency Care (RQF) skills and knowledge should be taught and assessed in accordance with currently accepted or prehospital care practice in the UK.

Methods

Qualsafe Awards has devised assessment tools to make sure Learners gain the required knowledge, skills and understanding, as detailed in the learning outcomes and assessment criteria shown in the Appendix 1. Centres should download all assessment papers from the Customer Portal in advance of the course. For each unit there are:

• Practical assessments/skills tests – observed by the Trainer throughout the course, with the results of each learning outcome recorded on the practical assessment paperwork, see QA Guide to Assessing QA Level 3 Certificate in First Response Emergency Care (RQF). There are 14 practical assessments/skills tests for this qualification:
  • Adult CPR and AED (FREC)
  • Airway management
  • Assessment and treatment of trauma (bleeding)
  • Burn severity
  • Child cardiopulmonary resuscitation (FREC)
  • Choking patient (FREC)
  • Circulatory system
  • Infant cardiopulmonary resuscitation
  • Management of fractures (FREC)
  • Medical emergencies
  • Patient report form (FREC)
  • Respiratory system
  • Secondary survey (FREC)
  • Unconscious patient
• Formative assessments – a range of informal assessment procedures employed by the Trainer/Assessor during the learning process to measure each Learner’s knowledge, skills and understanding related to the assessment criteria
• Theory assessment/multiple choice question papers – there is 1 paper per unit for each Learner and Learners should answer all the questions under ‘examination’ conditions, see QA Multiple Choice Question Paper Guidelines:
  • Maximum time for Unit 1 is 30 minutes, for Unit 2 it is 45 minutes and for Unit 3 it is 45 minutes
  • Minimum mark for Unit 1 is 14 out of 20, for Unit 2 it is 21 out of 30 and for Unit 3 it is 21 out of 30 to be considered for an overall ‘Pass’. However, even when a Learner achieves this minimum, Trainers are expected to make a professional judgement as to whether that Learner has achieved all the assessment criteria. Trainers should use all assessment evidence available, including formative and practical assessments, to reach this judgement

Note: Centres should download all assessment papers from the Customer Portal in advance of the course.
Access to assessment

Qualsafe Awards is committed to equality and when designing the assessments for this qualification has made sure they are:

- As accessible as reasonably possible
- Able to permit reasonable adjustments to be made, while minimising the need for them

Note: If you have any suggestions for improvements, please let us know.

Centres should make sure all Learners have access to assessment and are given equal opportunities to demonstrate their competence, see QA Multiple Choice Question Paper Guidelines.

If a reasonable adjustment or special consideration has been made, e.g. written/theory assessments may be completed verbally if required, Centres must mitigate risk in line with QA policies and complete a Record of Reasonable Adjustments/Special Considerations Form, available to download from the Customer Portal. For more details see QA Access to Assessment Policy.

Note: Upload completed Record of Reasonable Adjustments/Special Considerations Forms to the Customer Portal when requesting certification.

Learners should be informed about Centre’s and QA’s appeals procedures and how they can access these.

Specific equality issues relevant to this qualification

It is important no Learner is turned away from a training course due to disabilities or impairments. To assess competence and gain certification however, the Learner will need to demonstrate certain practical skills. For instance, for first aid qualifications the Learner must be assessed performing practical tasks such as CPR, as per QA Guide to assessing QA Level 3 Certificate in First Response Emergency Care (RQF). To pass the assessment, the Learner must demonstrate the required practical skills without assistance from a third party (unless authorised by QA following a reasonable adjustment request).

Informal record of achievement

If a Learner with disabilities cannot perform 1 or more of the practical tasks required, it may be possible for the Centre to provide a letter recording the learning outcomes that the Learner achieved. For example, a Learner may be able to demonstrate ‘chest compression only CPR’, instruct a third party how to place a patient in the recovery position and pass the theoretical assessments. The letter should clearly state that “this record of achievement does not constitute a QA Level 3 Certificate in First Response Emergency Care (RQF)”.

Quality assurance

Centre internal quality assurance

The Centre is required to sample a reasonable amount of assessments as part of the quality of the qualification. This standardisation of assessment across Learners and Trainers is to make sure there is fairness and consistency in assessment practices. The arrangements for this should be included in the Centre’s approved internal quality assurance policy.

Centres must retain all Learner documents and records for a period of 3 years and make sure these are available for review by QA or their representatives, e.g. External Quality Assurers (EQAs), on request.

Qualsafe Awards external quality assurance

Qualsafe Awards operates a system of ongoing monitoring, support and feedback for approved Centres across the United Kingdom.
Centres are required to inform Qualsafe Awards (via email to: qualityassurance@qualsafeawards.org) of all courses using the Course Notification Form, prior to delivery (ideally a minimum of 7 working days), to enable implementation of the EQA strategy for this qualification. The Course Notification Form can be found in the Downloads Sections of both the QA Portal and QA Website.

Direct Claims Status (DCS) for this qualification will only be granted upon 3 successful QA audits across 3 courses. A minimum of 1 EQA visit will be carried out within 12 months of the first course date.

Further details of the Qualsafe Awards’ external quality assurance programme are available in the QA Centre Quality Assurance Guidance.

### Learning outcomes

**The Learner will:**

<table>
<thead>
<tr>
<th>Learning outcomes</th>
<th>Assessment criteria</th>
</tr>
</thead>
</table>
| **1. Understand the role and responsibilities of a first responder providing emergency care** | 1.1 Summarise role and responsibilities of a first responder providing emergency care  
1.2 Apply methods to minimise the risk of infection to self and others  
1.3 Identify need for establishing consent to provide first response emergency care  
1.4 Identify first response emergency care equipment  
1.5 Demonstrate safe use of first response emergency care equipment  
1.6 Use an appropriate method to record an incident  
1.7 Identify patient specific medical documents |

| **2. Be able to assess an incident** | 2.1 Perform a dynamic scene risk assessment  
2.2 Demonstrate initial management of a scene  
2.3 Give examples of when and how to call for help |

| **3. Be able to assess a patient** | 3.1 Perform a primary survey  
3.2 Assess a patient’s level of consciousness  
3.3 Perform a secondary survey |

| **4. Be able to assess a patient’s airway** | 4.1 Identify airway anatomy  
4.2 Implement stepwise airway management methodologies  
4.3 Demonstrate dynamic airway assessment |

| **5. Be able to manage a patient’s airway** | 5.1 Explain need to clear the airway  
5.2 Demonstrate how to clear the airway using:  
• Postural drainage  
• Manual techniques  
• Recovery position  
• Suctioning equipment  
5.3 Demonstrate how to select and insert an:  
• Oropharyngeal airway adjunct  
• Nasopharyngeal airway adjunct  
5.4 Demonstrate removal of an:  
• Oropharyngeal airway adjunct  
• Nasopharyngeal airway adjunct  
5.5 Differentiate between a patient with a partially blocked airway and a completely blocked airway  
5.6 Demonstrate how to manage a patient with a:  
• Partially blocked airway  
• Completely blocked airway |

---

L3-FREC-QS-V4 May 2018

Copyright © 2018 Qualsafe Awards. All rights reserved
6. Be able to manage an unresponsive patient who is not breathing normally

| 6.1 Demonstrate how to open patient’s airway and check for breathing |
| 6.2 Justify when to commence cardiopulmonary resuscitation |
| 6.3 Demonstrate cardiopulmonary resuscitation for an adult on a manikin |
| 6.4 Demonstrate cardiopulmonary resuscitation for a child on a manikin |
| 6.5 Demonstrate cardiopulmonary resuscitation for an infant on a manikin |
| 6.6 Perform a patient handover |
| 6.7 Explain modifications required during cardiac arrest for: |
| • Third trimester pregnancy |
| • Neck stoma |
| 6.8 Clarify when resuscitation should not be attempted |
| 6.9 Explain return of spontaneous circulation procedures |

7. Be able to use appropriate equipment during a resuscitation attempt

| 7.1 Justify when to use an automated external defibrillator |
| 7.2 Demonstrate effective use of an automated external defibrillator |
| 7.3 Summarise safety considerations when using an automated external defibrillator |
| 7.4 Demonstrate use of: |
| • Bag valve mask device (BVM) |
| • Pocket mask |
| • Oxygen connected to BVM or pocket mask |
| 7.5 Explain modifications for child defibrillation |

8. Be able to administer emergency oxygen

| 8.1 Identify indications for emergency oxygen therapy |
| 8.2 Identify health and safety principles for the use of oxygen |
| 8.3 Demonstrate how to administer emergency oxygen |
| 8.4 Monitor the effects of emergency oxygen |

Other information

Medical documents
May be specific to the Learners’ setting and can include:
- Do not attempt CPR forms
- Advanced decisions
- Living wills
- Prescriptions
- No known drug allergy patches

Primary survey
Should include prioritised assessment of <C> AcBCDE (Catastrophic bleeding, Airway, c-spine, Breathing, Circulation, Disability, Environment/Exposure)

Level of consciousness
Can be measured using the AVPU or Glasgow Coma Scale method

When to commence cardiopulmonary resuscitation
Should include recognition of agonal gasps

Resuscitation should not be attempted:
- Clinician tells you to stop
- Massive cranial and cerebral destruction
- Hemicorporectomy or similar massive injury
- Decomposition/putrefaction
- Incineration
- Hypostasis
- Rigor mortis
- Exceptional circumstances/remote location/Search and rescue environment

(this list is not exhaustive)

### Other information

**Methods to treat external bleeding**
Should include:
- Direct pressure
- Embedded object

**Intoxicating substances**
Should include:
- Caffeine
- Illegal highs
- Illegal drugs
- Alcohol
- Viagra

**(this list is not exhaustive)**

**Safety helmet**
Must include:
- Motorcycle helmet

Should include:
- Ballistic helmet
- Nato helmet
- Cycle helmet
- Emergency service issue helmet
- Construction industry helmet

**(this list is not exhaustive)**

**Immobilisation devices**
Must include:
Pelvic splints

May include:
Cervical collars

**(this list is not exhaustive)**
### Qualification unit 3

**Title:** Unit 3 First Response Emergency Care of Medical Conditions

**Unit ref:** L/507/1026

**GLH:** 11

**Level:** 3

**Credit value:** 5

<table>
<thead>
<tr>
<th>Learning outcomes</th>
<th>Assessment criteria</th>
</tr>
</thead>
</table>
| **1. Understand how to identify a patient with breathing difficulties** | 1.1 Identify major components of the respiratory system  
1.2 Explain recognition features of hypoxia  
1.3 Explain recognition features of asthma  
1.4 Explain recognition features of hyperventilation  
1.5 Explain recognition features of a chest injury  
1.6 Explain recognition features of positional asphyxia |
| **2. Understand how to manage a patient with breathing difficulties** | 2.1 Explain how to manage a patient with acute asthma  
2.2 Assemble spacer device with reliever inhaler  
2.3 Summarise how to manage a patient who is hyperventilating  
2.4 Summarise the management of an open chest injury  
2.5 Manage a positional asphyxiated patient |
| **3. Know how to manage a patient with anaphylaxis** | 3.1 Identify common triggers of anaphylaxis  
3.2 Identify life-threatening features of anaphylaxis  
3.3 Distinguish between allergic reaction and anaphylaxis  
3.4 Demonstrate management of a patient with anaphylaxis  
3.5 Demonstrate safe use of an adrenaline auto-injector |
| **4. Know how to manage a patient with suspected major illness** | 4.1 Summarise recognition features of major illnesses including:  
• Heart Attack  
• Angina  
• Stroke  
• Diabetes  
• Meningitis  
4.2 Explain how to manage major illnesses including:  
• Heart Attack  
• Angina  
• Stroke  
• Diabetes  
• Meningitis |
| **5. Know how to manage a patient who is in seizure** | 5.1 Recognise seizures including:  
• Partial seizure  
• Generalised seizure  
5.2 Explain how to manage a patient in seizure |
Appendix 2 – Occupational knowledge and competence in prehospital care

All Trainers, Assessors and EQAs must have occupational knowledge and competence in prehospital emergency care.

Acceptable evidence includes:

- Current registration as a Doctor with the General Medical Council (GMC) or
- Current registration as a Nurse with the Nursing and Midwifery Council (NMC) or
- Current registration as a Paramedic with the Health and Care Professions Council (HCPC) or
- QA Level 5 Diploma in First Response Emergency and Urgent Care (RQF) or
- Institute of Health and Care Development (IHCD) Ambulance Technician or
- Level 4 Diploma for Associate Ambulance Practitioners (QCF or RQF) or
- QA Level 4 Certificate in First Response Emergency Care (QCF or RQF) or
- Defence medic or
- IHCD First Person on Scene – enhanced or
- Equivalent*

and

- Provide an up-to-date portfolio showing recent experience (within the last 2 years) of working in an emergency care environment.

*Other equivalent qualifications must be submitted to Qualsafe Awards with detailed evidence of course/qualification content, learning outcomes and assessment criteria.

This list is not exhaustive but provides a guide to acceptable qualifications. Trainers who also assess student competence must hold a qualification (or separate qualifications) to enable them to perform both functions.
Appendix 3 – Acceptable training/assessing qualifications

This list is not exhaustive but provides a guide to acceptable training and/or assessing qualifications. Trainers who also assess Learner competence must also hold or be working towards an acceptable assessor qualification, as identified in the table below:
